

TERITORY IN BRIEF.

What We Find in Our News Exchanges.

GENERAL ROUND-UP FOR THE WEEK.

Mining, Farm and General News of Special Interest to Our Readers From Every Part of the Territory.

Commer Taylor and his sons have disclosed the death of Capt. F. Ferguson, the unfortunate man who was so terribly crushed by a rock at Langton's lime stone quarry on Saturday was discovered to be an accident. No blame could be attached to any person. The funeral services will be held today at the family residence at Superior, about three miles from Salina—Salina Press.

Development work on R. J. Bell's mining claim in Salina canyon is going along nicely. Two trucks are being driven into the side of the hill and good copper and lead ore has been taken out. Mr. Bell is equally anxious as to results and thinks that a few more weeks of active work will demonstrate the fact that pay dirt exists in vast quantities near Salina—Salina Press.

Now is the time for every one to see that the premises surrounding their houses be cleared from all brush and more especially all decaying vegetation. The decomposing of the trees, roots and vegetables left upon the ground, will in time, if left exposed, cause effluvia and poisonous particles to rise and mix with the atmosphere, which thereby becomes foul and unfit for our lungs, carrying with it germs of disease that oil and water cannot dodge without a great deal of difficulty. The people here are used to inviting such visitors, and to also encourage them to linger around their houses.—Salt Lake Courier.

A sad case of drowning is reported from Aurora, in this country. A little son of Mrs. James Broadhead, was the victim. The child, in company with other children, was playing near the main canal which passes in front of the house, and to some unaccountable manner fell in and was carried by the swift current to a point nearly a quarter of a mile below. The little one was not missed until some time afterward. The mother's grief was painful. Only last spring her husband died, and this child was the apple of her eye. The funeral occurred Sunday—Salina Press.

Dr. E. T. Husted and wife met with a very unfortunate accident on last Friday evening. They were walking north on Main street, and looking at the Democratic torchlight procession when by passing their hosts they fell into the aqueduct. The doctor had three ribs broken, while his wife dislocated her arm and broke the bone above the elbow. So soon being with them and the night very dark they lay in the creek some time before assistance came. Strangers passing by heard groans and pulled them out. When taken home medical assistance was called, and their injuries attended to. Mrs. Husted is still in a bad condition, and even more serious trouble is anticipated.—Manti Messenger.

The whole Territory of Utah, will be a gainer from that advertising in the Inter-Ocean by the Bear River Canal Company. It is something that Utah has long felt the need of. We look to see Commer augmented by a better and more progressive farming community than any other town in Utah as a result of this vigorous advertising.

There are thousands of young farmers in the East who, fully instructed as to the advantages of farming in Utah, would come to the Territory. It is only a question of putting the information before them in the proper shape. As the writer pointed out in these columns last week, Utah agriculture has been easily neglected. There could be a vigorous cheering on; otherwise, it will not be long when Utah will be held up before the world as the least progressive agricultural state in the Union. It is just such enterprise as is displayed by the Bear River Canal Company that is needed and badly needed in Utah; it is just such enterprises that would very soon result in building the agricultural product of the territory.—Utah Tribune.

Otto Lofte of Big Piney, Wyo., is introducing a novelty in the stock business. He lately took his cattle to Omaha for sale, and having plenty of feed at home, purchased 325 fast spring calves all steers, and shipped them to Wyoming to feed and fatten. Four of those calves he paid from \$1.00 to \$2.00 per hundred pounds, the average weight being 225 pounds, making the average cost per head \$0.75 at Omaha. To ship to Ogallala, Wyo., cost an average of \$1.00 per head, bringing the average cost of those steers at Ogallala up to \$0.75. Mr. Lofte feels quite confident of making his shipping of Nebraska calves to Wyoming a profitable business, and his opinion in this new venture will be closely watched by cattle raisers.—Tribune.

Thursday of this week W. W. masters, one of Park City's leading citizens, returned home from an extended trip through the territory in search of thoroughly tested Jersey cattle, with which to improve the quality of the

product of his dairy. At Price he succeeded in finding what he wanted and purchased several head, which he brought home with him, and although which he proposes to hold up the re-opening of his dairy until it is secured to him. Mr. Masters is convinced that the milk of Jersey cow is the very best in the world for family use, and that is the trade he desires to secure. He is thoroughly satisfied with the stock purchased and rejoices that his business continues to grow with him, as gives of rich milk, the Jersey cow can outlast the Brown.

The regular meeting of the County Horticultural society was held at the county court house yesterday. Mr. D. Justice presiding with J. H. Tapp as secretary. After the routine business had been disposed of, a number of the gentlemen present made short addresses in regard to their work, using the opportunity of reading some literature into the country. Miss F. A. Dix, T. E. Vining and George Baker were appointed a committee to walk on the country court house grounds. The society will hold its next meeting on the first Saturday in December.—Herald.

Yesterday morning about 8 o'clock Frank M. Adams, the 14-year-old son of F. W. Adams, who had a leg cut off by being thrown under a moving freight train at Ogallala. The left leg was cut off between the knee and ankle.—Ogallala Dept. U. S. Tribune.

T. Ferrier, son of Bishop Ferrier of Edson, met with a serious accident. He was at Promontory and while out riding, was thrown under the rear wheel of a team of horses. The left leg was cut off between the knee and ankle.—Ogallala Dept. U. S. Tribune.

The south end of Cache county is becoming noted for its gas wells. A short distance below Smithfield there are two or three families who utilize natural gas for lighting and heating purposes, and last week another well of gas was struck by Harry Gleason, who was boring an artesian well on John Bingham's farm near Trenton. On reaching a depth of 400 feet a flow of gas was struck, which when ignited, shot a flame fifteen feet into the air. It is believed that gas abounds in that region, and further attempts will be made to secure it.—News.

Yesterday morning at 7 o'clock it was discovered that a shooting had taken place at the Union depot freight yards last night about 8 o'clock, the result being a badly wounded man. It seems from the story of the wounded man, whose name is C. A. Daniels and whose place of residence is Salt Lake City, that he is a poor son of his way to Battle Mountain, where he had secured a position in a hotel. Being without money he attempted to beat his way west over the Southern Pacific. As he "strayed" no empty stock car he says that the Southern Pacific watchman fired a shot at him, which struck him in the right hip. The train was just pulling out and he was carried for about the road before he was discovered. He was then taken to Promontory where he was laid off and sent back to Ogallala, being placed in the city hospital. It was late in the day, when the surgeon finally extracted the bullet. The wounded man is in a precarious condition, but with the chances in his favor. The man whom is alleged did the shooting is Joseph H. McElroy, who has for several months been employed as watchman in the Southern Pacific yards. He was placed under arrest upon the statement of the wounded man and is held awaiting development. He says that he saw some one attempting to get on a Southern Pacific and after calling him to get off fired a shot in the air to frighten him. If the man was shot, it was an accidental shot or glancing shot or the man was shot by some one else. The wounded man was very weak last night from loss of blood, but seemed bright. He is a man of good appearance, probably about 35 years of age.—Ogallala Dept. U. S. Tribune.

On a case of drowning, it was fully instructed that advertising in the Inter-Ocean by the Bear River Canal Company. It is something that Utah has long felt the need of. We look to see Commer augmented by a better and more progressive farming community than any other town in Utah as a result of this vigorous advertising.

There are thousands of young farmers in the East who, fully instructed as to the advantages of farming in Utah, would come to the Territory. It is only a question of putting the information before them in the proper shape. As the writer pointed out in these columns last week, Utah agriculture has been easily neglected. There could be a vigorous cheering on; otherwise, it will not be long when Utah will be held up before the world as the least progressive agricultural state in the Union. It is just such enterprise as is displayed by the Bear River Canal Company that is needed and badly needed in Utah; it is just such enterprises that would very soon result in building the agricultural product of the territory.—Utah Tribune.

Frank Dugger is the proprietor of the "Wright Iron Range Company's Home Comfort range," manufactured by the Wright Iron Range company of St. Louis, Missouri. He has a large stock of ranges, and takes pleasure in stating that it has proven entirely satisfactory in every particular and I consider it the best range I have ever used.

Mrs. M. H. Beardsley, Rio Grande Western Dining Station.

She Likes the Home Comfort.

Alamosa, Colo., Feb. 5, 1894.—This testifies that I purchased from the Wright Iron Range company's Home Comfort range, manufactured by the Wright Iron Range company of St. Louis, Missouri, eight years ago, and I find it to be the best range I have ever used in my house. It has neither warped, nor twisted nor turned out, and is today as good as the day bought it. By saying of fuel it has no particular convenience. It burns quickly and evenly, and the heat given off cannot be equalled by any other range. I have moved it over several states and will never part with it. I recommend it to all, no matter what kind of stove they may be using.—C. H. McElroy.

Few Digestions.

Loco de amores, tristezas, lenguor, cromic, dolores y gran dolor. Hood's "Parasol" is the answer. It tones the stomach, creates an appetite, and gives a relish to food.

It tones the bowels and gives beauty to the skin. It is the pride of the family.

Hood's "Pills" become the favorite with every one who tries them.

A Coming Business.

Superintendent of the Dale-Taylor said the writer this week that the big iron house had been completed and now contained a large quantity of iron castings, but that as yet no shipments had been made.

He also stated that a large number of second-class rock had been loaded and placed on the barrows for construction as soon as the company's mill was built, which would be as early as the spring as possible. The plan and style of the mill is to be erected and we yet have thoroughly determined upon, but that it would in all probability be a counterpart of the Packard mill in the Dale-Taylor mining district, which combines both concentration and amalgamation, and has given the most perfect satisfaction of any mill in the territory. Mr. Dale said it was his intention to construct the mill this fall, but he found that it was impossible to carry out his plans before the deep snow and rough weather should overtake him, and it was decided not to commence construction until in the spring, when the work could be prosecuted to better advantage in every particular.

The sale, Mr. Dale, says, is looking remarkably well and there are 60 larger or smaller lots in his future, but, the realists have been presented to an extent that proves it to be a bonanza.

For the Chicago Union Pacific and Northwestern Lines offer the best rates and facilities in the traveling public, and you will be surprised if before purchasing it, and consider it one of the best investments I have ever made for an article of domestic use.

—FREDERICK ALLEN.

and another big and rich produce to be added to the already long list standing to the credit of Park City.—Record.

Thanksgiving Proclamation.

The President Wednesday issued the following proclamation:

The American people should gratefully render thanksgiving and praise to the Supreme Being of the universe, who hath watched over them with kindness and favor throughout the year that has passed, they should also, with humility and faith, supplicate the bounties of all creatures for continued blessings and according to their needs, they should, by faithful charity, make known the favors of every good and perfect gift. Therefore, I, Grover Cleveland, president of the United States, do hereby appoint and set apart Thursday, the 28th day of November, 1894, as a day of Thanksgiving and Praise to be observed in every part of the land.

Witness my hand and the seal of the United States, which I have caused to be herein affixed.

Given at Washington, D. C., this 28th day of November, 1894.

By the President, W. J. Gresham Secretary of State.

New York, Nov. 21.—Colonel von der Heydt, president of the New York Central, is a guest of the Victoria Inn.

Concerning the political effect the death of the man would have in Europe, the colonel said he had nothing to say. He said he visited Alaska and was much impressed by the country, and particularly by the men there.

He said Alaska was a great country, and the auto he saw it in the better he liked it.

Before he goes home he will visit Cuba and the Bahamas.

Following is a short notice between the two lower ribs.

In a short time after either break on the left side you would take the right side when you have been sitting for a long time. This will cause you to feel uncomfortable.

When you sit down you will feel like a load.

When you stand up you will feel like a load.

When you sit down you will feel like a load.

When you stand up you will feel like a load.

When you sit down you will feel like a load.

When you stand up you will feel like a load.

When you sit down you will feel like a load.

When you stand up you will feel like a load.

When you sit down you will feel like a load.

When you stand up you will feel like a load.
